Our activities

Providing network solutions.

We study the client company and provide appropriate technical solutions to them for the development of technical services at the client.

- Provide the best service available to the community at an affordable price.
- Generate substantial market share so that PC Repair is a common name.
- Constant growth in sales from start up through year three.
- Generate customer satisfaction so that at least 40% of our business is from loyal customers.

Mission

Our goal is to set the standard to provide on-site solutions through fast service and response. Our customers will always receive one-on-one personal attention at a very affordable price. Our customers will receive the highest quality of customer service available. Our employees will receive extensive training, a great place to work, fair pay and benefits, and incentives to use their own good judgment to solve customers problems.

Keys to Success

- Establishing a brand identity and generating brand recognition through marketing.
- Responsiveness: being an on-call computer paramedic with fast response time.
- Quality: getting the job done right the first time, offering 100% guarantee.
- Relationships: developing loyal customers--retainers.

Processing Network Infrastructure

We extend the processing of network infrastructure for cabling (UTP & Fiber) extensions work, necessary connections and installation of spreaders and the work of their own settings (Termination & Configuration), we are using Best networks solutions & materials with a very good quality stays for long time (forever) from the biggest and best company Reichle & De-Massari convincing cabling solutions.

Convincing cabling solutions

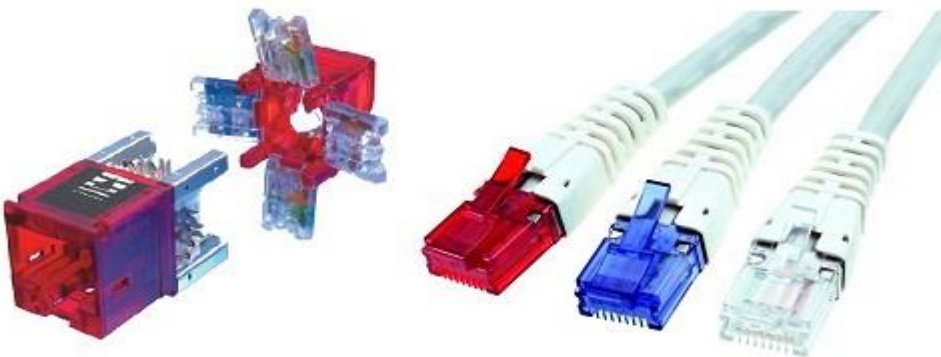

R&M network solutions:-

Reichle & De-Massari [R&M] is a leading supplier of passive cabling solutions for high-quality communication networks. With its copper and fiber optic systems the company contributes significantly towards ensuring operational reliability in voice, data and image transmission - worldwide.

R&M's high level of product quality and forward-looking system design ensure that the networks are sustainable and the investments safeguarded. R&M cabling solutions are used in office buildings and homes, by network operators and in industry.

As a systems provider R&M has set itself the target of developing optimum functionality and, above all, satisfying the highest quality criteria. R&M also provides maximum installation and maintenance convenience. R&M solutions stand out by virtue of their maximum availability combined with cost-effective network operation.

Please check the web site for more information - <http://www.rdm.com> .

We install and prepare all kinds of Fire alarms systems for data Center rooms, we provide good solutions for the fire alarms systems & best technicians.

Services

Laptop Repair will offer computer repairs, training, and networking and upgrade service to clients in two major categories: home PC users and small business users. As laptop Repair and the client demands grow, we will offer software development to our business clients.

From the very first day, we will offer on-site repair and consulting services, so that our clients don't need to take time out of their busy days to haul a computer in to our workshop. This is the single biggest frustration we have seen among small business owners needing computer help. Much of our diagnostic equipment is portable, and we will move a laptop to our workshop only when the problem requires diagnosis that is more detailed or repair. We will also offer free pick-up and delivery of laptops needing repair. To meet the growing demand for this service, we purchased a company vehicle in the third month.

We also offer extended maintenance contracts, so that business clients can deal with technical support and repair needs as a single line-item expense, rather than having to plan for unexpected crashes and problems with a rainy-day fund they may never use. Maintenance contracts yield a high gross margin for us, and provide peace of mind for the customer.

We offer limited software support (installation and compatibility issues), and focus on hardware and networking support - this is a vital distinction, since software is evolving much more rapidly than hardware, and our clients will have such diverse software needs that we couldn't possibly keep up with all of them. We encourage clients to register their software and use the software's own support options to their full potential. We will, however, keep up to date with multiple operating systems and networking developments, working with clients to make sure they have the most appropriate combinations of hardware, OS, networking, backup systems, and software. Backup and security are becoming higher priorities for all our potential customers, as internet usage (and its pitfalls) becomes more common, and as more and more daily records are stored electronically.

Company maintenance contract

We are proud that we have a maintenance contract more than 8 years with Acer. We also take pride in the consent Acer customers by our services and speed in performance, with the help of our qualified engineers.

Innovation has always been MSI strong suit. The long-term dedication to the development of intelligent technology has rendered MSI great in its flexibility in the pursuit of compatible business models and optimal sales channels.

MSI not only holds itself responsible to its clients, employees and stockholders, but also to society and the environment. Through the development of eco-friendly technology, MSI and its partners relentlessly strive towards a sustainable future for all.

Proud to Have Maintenance Contract with MSI, has set Customers sustainability as its utmost goal and win-win as the core value of cooperation for Good Services, and the continuity of the longest and customers satisfaction.
